Dear Customer,

This waiver will serve as notice to buyer that any building built beyond the height of 12' can potentially become unstable without ground supports and/or double legs in place.

These additional ground supports and/or double legs help to stabilize the structure and thus is highly recommended.

The buyer understands without these supports in place the company (Dreams Carports I, Inc.) will not assume nor accept any liability as it relates to structural failure of building.

This waiver will be placed on file with contract of building specifications and kept on file at company. Upon signing, buyer understands and accepts any potential liability.

Thank you,
