METAL GARAGE BOXED EAVE ROOF

CALL NOW TO ORDER!

With 400 sqft. of storage space, this garage is great for storing one car or truck, with added space for heavy equipment. There is a 10' wide x 10' tall garage door on the front that is large enough for almost any truck, with a walk-in door on the side wall for personal use. Total dimensions are 20' wide by 20' long by 10' tall. Customize it for whatever you need, including choosing from our wide selection of colors to find one that fits your style.

Built to protect your valuables for years to come, with very little maintenance needed. We use the highest quality American-made steel in our building frames. The roof and side wall panels are 29 gauge heavy duty steel sheets that are durable enough to stand up to bad weather and debris. The boxed eave roof has a traditional look and a strong construction that is guaranteed to be leak-free.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
