TWO CAR METAL GARAGE BOXED EAVE ROOF

CALL NOW TO ORDER!

Our 20' x 26' x 9' two car metal garage is an outstanding way to store your cars and trucks without breaking the bank. With 520 square feet of storage space, this garage can fit two cars, or one car with added equipment. The building comes standard with a large garage door, a walk-in door, and two windows. Customize this building by altering dimensions, adding or removing doors, and changing the color to find one that matches other building on your property.

Manufactured with quality galvanized steel framing and heavy duty roofing panels. Frame is fortified with corner and center bracing for maximum durability. 29 gauge side wall paneling helps protect your enclosed equipment from bad weather and falling debris. The boxed eave roof is guaranteed to be free of leaks and other defects. Built to last for years to come, with little maintenance and upkeep required.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
